

Industrie-Elektronik

QUALITY MAKES THE DIFFERENCE

unipo®

Brand of BVS Industrie-Elektronik

unipo® offers replacement solutions for products from well over 100 machine and controller manufacturers

unipo®

Brand of BVS Industrie-Elektronik

The advantages BVS has to offer:

- ✓ Development & reconstruction of fully compatible substitutes for numerous, even discontinued & legacy HMI/IPC original products
- ✓ Experience in the field of HMI/IPC since 1983 with over 500,000 units sold worldwide
- ✓ Lifetime service and support – even on site
- ✓ Durable and scalable module system
- ✓ Quick and easy replacement of the original products
- ✓ Increased colour brilliance of the displays compared to the original products
- ✓ Longer mechanical service life thanks to metal housing

unipo® - in-house HMI/IPC solutions

Individual solutions for visualisation systems

With our proprietary brand **unipo®** we have been developing in-house **specialist knowledge** with our **own HMI and IPC solutions** since 1983 and have now sold more than **500,000 units** worldwide. Our main focus is the **development** and **reproduction** of **fully compatible replacement solutions** for numerous already **discontinued** and **legacy HMI/IPC original products**.

These include products from **Siemens, Bosch Rexroth, Fanuc, Heidenhain** and **Heller**. On request, we will gladly check whether we can help you with your specific needs.

The **service and support** provided over the entire **product life cycle** – without the risk of discontinuation – is another essential factor for the sustainable operation of your systems. With **unipo®** we offer an individual **replacement program** as a long-lasting and scalable replacement for your existing systems.

Thanks to the use of **metal housings** and the modular **electronic** and **mechanical structure** of the **module system**, our customized solutions are more durable and scalable than many of the original versions. We are thus able to guarantee a **longer mechanical service life** of the products. The **unipo® displays** stand out thanks to **increased colour brilliance**. **TFT displays** are being installed instead of old **CRT monitors** enabling you to also benefit from considerably **lower power consumption**.

Existing **HMI/IPC applications** can be **quickly and easily** replaced with our own solutions without adapting the controller. This ensures that **straightforward project conversions**, particularly of operator panels, can be implemented without any problems.

* For **product-overhauling repairs** and the purchase of **refurbished spare parts** and **new parts**, you receive a **24-month warranty*** on the complete HMI or IPC solution..

We are available to answer your questions around the clock.

24/7 Hotline: **+49 6181 95404-200**

Fax: **+49 6181 95404-5**
